SUMMARY

Full-stack web developer with a practical approach: I build and deliver. Tech Lead of IMeet, a platform that connects mentors and students. I work with sprint-based agile methodology and test-driven development. MigraCode Barcelona graduate, July 2026.

CORE EXPERTISE

PERN stack (PostgreSQL, Express, React, Node.js), TailwindCSS, GitHub
Also: Python, FastAPI, SQLAlchemy, JavaScript, SQL, Vue, Firebase, Pytest, Test-Driven Development (TDD)

PROJECT EXPERIENCE

IMeet - Final project, MigraCode bootcamp | Tech Lead | June 2026 - July 2026

- Led a team of 4 from architecture to deployment to connect mentors and students, with React because the team already knew it; result: live demo, deployed on Netlify and Railway.
- Developed the backend with Python, FastAPI and SQLAlchemy, with PostgreSQL (Supabase) for relational data, and tested it with Pytest; result: a tested API that manages users, roles, slots and bookings.
- Adapted Express and Node knowledge to Python and FastAPI, a stack the team chose on purpose and nobody knew; result: a working backend for the live demo, built to show that development concepts work in any language.
- Integrated Google sign-in and Calendar/Meet sync as optional services, for speed; result: a booking creates the Calendar event with a Meet link automatically.

Minitweet - Vue course project, Escuela Da Vinci | Solo developer | September 2024 - December 2024

- Built a Reddit-inspired social network with Vue and Firebase (a BaaS, Backend as a Service, taught in the course), with my own authentication and authorization system; result: secure authorization that protects each user's posts from changes by others.
- Implemented CRUD of text and media posts, real-time comments and private chat; result: installable PWA with real-time features, deployed on Netlify.

EDUCATION

- Full-stack Web Developer (certified), MigraCode Barcelona | October 2025 - July 2026
  - Agile teamwork: planned sprints (milestones) and tracked tasks (Kanban board) with GitHub Projects.
  - Peer support: helped classmates learn JavaScript in my free time.
- Higher Technical Degree in Web Development and Design, Escuela Da Vinci (Argentina) | August 2022 - present
- Platzi, online training in technology and programming | 2023 - present
