CARLOS MARQUINA

Full-stack Web Developer
contact@carlosmarquina.dev | +34 663 14 37 97 | Barcelona, Spain | GitHub | LinkedIn | Portfolio

SUMMARY

Full-stack web developer with a practical approach: I build and deliver. Tech Lead of IMeet (Python, FastAPI, PostgreSQL, React), a platform that connects mentors and students. Agile and test-driven. MigraCode Barcelona graduate, July 2026.

CORE EXPERTISE

PERN stack (PostgreSQL, Express, React, Node.js), TailwindCSS, GitHub
Also: Python, FastAPI, SQLAlchemy, JavaScript, SQL, Vue, Firebase, Pytest, Test-Driven Development (TDD)

PROJECTS

IMeet | Tech Lead | June 2026 - July 2026

- To connect mentors and students, I led a team of 4 from architecture to deployment, with React because the team already knew it; result: live demo, deployed on Netlify and Railway.
- For the backend, I used Python, FastAPI and SQLAlchemy with PostgreSQL (Supabase) for relational data (users, roles, slots, bookings), and tested it with Pytest; result: 225 of the 365 commits in the repository.
- The team chose Python and FastAPI on purpose, a stack nobody knew, and used our Express and Node knowledge to adapt; result: a working backend for the live demo, built to show that development concepts work in any language.
- To schedule each session, I added Google sign-in and Calendar/Meet sync as optional services, for speed; result: a booking creates the Calendar event with a Meet link automatically.
- Link | Code

Minitweet | Solo developer | September 2024 - December 2024

- For a Vue course at Escuela Da Vinci, I built a Reddit-inspired social network with Vue and Firebase (a BaaS, Backend as a Service, taught in the course), with my own authentication and authorization system; result: users can only edit or delete their own posts, installable PWA, deployed on Netlify.
- I added CRUD of text and media posts, real-time comments and private chat; result: 95 commits, all mine.

EXPERIENCE

MigraCode, Barcelona | Peer support (informal) | October 2025 - July 2026

- Helped classmates who asked me to learn JavaScript, in my free time.
- Planned sprints (milestones) and tracked tasks (Kanban board) with GitHub Projects in agile teams.

EDUCATION

- Full-stack Web Developer (certified), MigraCode Barcelona | October 2025 - July 2026
- Higher Technical Degree in Web Development and Design, Escuela Da Vinci (Argentina) | August 2022 - present
- Platzi, online training in technology and programming | 2023 - present

LANGUAGES

- Spanish: Native
- English: Conversational
